AI FinOps Assistant — Cloud Cost & Optimization Report

Executive Summary

Metric	Value
Total Cloud Cost	\$952.15
Resources Analyzed	7
Potentially Wasteful Resources	4
Top Service	AWS EC2
Potential Savings	\$466.10

Cloud Cost Breakdown

Service	Cost	Share
AWS EC2	\$676.10	71.0%
AWS RDS	\$180.75	19.0%
AWS S3	\$55.30	5.8%
AWS EBS	\$40.00	4.2%

Potentially Wasteful Resources

Resource	Service	Cost	CPU	Status
EC2-001	AWS EC2	\$120.50	5%	active
EC2-003	AWS EC2	\$95.20	7%	active
VOL-001	AWS EBS	\$40.00	0%	unattached
EC2-004	AWS EC2	\$210.40	8%	active

Optimization Recommendations

- Review resources with very low CPU utilization and consider rightsizing them.

- Review unattached storage resources and remove them if they are no longer required.
- Monitor high-cost resources regularly to identify unexpected spending.
- Configure cloud spending alerts and budgets to detect unusual cost increases.

Note: Potential savings are estimates based on the uploaded billing data and the CloudWise detection rules. They are not guaranteed savings.
